Section 1  Identification of the chemical and of the supplier

1.1  Product Identifier
Tim-bor Industrial

1.2  Other means of identification
Chemical name: Disodium octaborate tetrahydrate
Synonyms: EPA Name: Tim-bor Industrial
Canada PMRA Name: 20 Mule Team Tim-bor Industrial Wood Preservative

1.3  Recommended use of the chemical and restrictions on use
Wood Preservative
EPA Reg No. 1624-39
Canada PMRA PCP Reg. No. 18879

1.4  Supplier's details
Company name: U.S. Borax Inc.
Address: 14486 Borax Road
Boron, CA 93516-2000, USA

Supplied by in Canada
P.O. Box 8090
London, Ontario N6G 2B0 2

Telephone number: +1 (760) 762-7000
Email: rtm.msds@riotinto.com

1.5  Emergency phone number
(1) 866 928 0789 (24-Hr Toll-free number)
(1) 215 207 0061 (24-Hr Non toll-free number)

Section 2  Hazards identification

2.1  Classification of the substance or mixture
Reproductive Toxicity Category 2

2.2  GHS label elements, including pictogram or symbol, signal word, hazard and precautionary statements
Hazard pictograms

Signal word: Warning

Hazard statements:
H361: Suspected of damaging fertility or the unborn child.

Precautionary statements:
P202: Do not handle until all safety precautions have been read and understood.
P308+P313: IF exposed or concerned: Get medical advice/attention.
P501: Dispose of contents/container in accordance with local regulation.
Other hazards which do not result in classification (e.g. dust explosion hazard): None

See Section 8 for Occupational Exposure Limits

### Section 4  First aid measures

#### 4.1 Description of necessary first aid measures
Protection of first-aiders: No special protective clothing is required.

**Inhalation:** If symptoms such as nose or throat irritation are observed, remove to fresh air.

**Eye contact:** Use eye wash fountain or fresh water to cleanse eye. If irritation persists for more than 30 minutes, seek medical attention.

**Skin contact:** No treatment necessary.

**Ingestion:** Swallowing small quantities (one teaspoon) will cause no harm to healthy adults. If larger amounts are swallowed, give two glasses of water to drink and seek medical attention.

#### 4.2 Most important symptoms and effects both acute and delayed
Symptoms of accidental over-exposure to high doses of inorganic borate salts have been associated with ingestion or absorption through large areas of severely damaged skin. These may include nausea, vomiting, and diarrhoea, with delayed effects of skin redness and peeling (see Section 11).

#### 4.3 Indication of any immediate medical attention and special treatment needed
Note to physicians: Supportive care only is required for adult ingestion of less than a few grams of the product. For ingestion of larger amounts, maintain fluid and electrolyte balance and maintain adequate kidney function. Gastric lavage is only recommended for heavily exposed, symptomatic patients in whom emesis has not emptied the stomach. Hemodialysis should be reserved for patients with massive acute absorption, especially for patients with compromised renal function. Boron analyses of urine or blood are only useful for verifying exposure and are not useful for evaluating severity of poisoning or as a guide in treatment.

### Section 5  Fire-fighting measures

#### 5.1 Suitable extinguishing media
Use extinguishing media that are appropriate to local circumstances and the surrounding environment.

**Unsuitable extinguishing media:** None

#### 5.2 Special hazards arising from the chemical
None. The product is not flammable, combustible or explosive.

#### 5.3 Special protective equipment and precautions for fire fighters
Not applicable. The product is itself a flame retardant.

### Section 6  Accidental release measures

#### 6.1 Personal precaution, protective equipment and emergency procedures

**For non-emergency personnel:**
Eye goggles and gloves are not required for normal industrial exposures, but eye protection according to ANSI Z.87.1 or other national standard. Respirators should be considered if environment is excessively dusty.

**For emergency responders:**
Eye goggles and gloves are not required for normal industrial exposures, but eye protection according to ANSI Z.87.1 or other national standard. Respirators should be considered if environment is excessively dusty.
6.2 **Environmental precautions:** The product is a water-soluble white powder that may cause damage to trees or vegetation by root absorption. Avoid contamination of water bodies during clean up and disposal. Advise local water authority that none of the affected water should be used for irrigation or for the abstraction of potable water until natural dilution returns the boron value to its normal environmental background level or meets local water quality standards.

6.3 **Methods and material for containment and cleaning up**

**Appropriate containment:** Avoid spillage into water and cover drains.

**Land spill:** Vacuum, shovel or sweep up and place in containers for disposal in accordance with applicable local regulations.

**Spillage into water:** Where possible, remove any intact containers from the water.

6.4 **Reference to other sections**

Refer to sections 8, 12 and 13.

---

**Section 7**

**Handling and storage**

7.1 **Precautions for safe handling**

Good housekeeping procedures should be followed to minimise dust generation and accumulation. Avoid spills. Do not eat, drink and smoke in work areas. Wash hands after use. Remove contaminated clothing and protective equipment before entering eating areas.

7.2 **Conditions for safe storage, including any incompatibilities**

No special handling precautions are required, but dry, indoor storage is recommended. To maintain package integrity and to minimise caking of the product, bags should be handled on a first-in first-out basis.

**Storage temperature:** Ambient

**Storage pressure:** Atmospheric

**Special sensitivity:** Moisture (Caking)

---

**Section 8**

**Exposure controls/personal protection**

8.1 **Control parameters**

**Occupational exposure limit values:** In the absence of a national OEL, Rio Tinto Borax recommends and applies internally an Occupational Exposure Limit (OEL) of 1 mg B/m³. To convert product into equivalent boron (B) content, multiply by 0.21.

<table>
<thead>
<tr>
<th>Occupational Exposure Limits:</th>
</tr>
</thead>
<tbody>
<tr>
<td>OSHA/PEL (total dust)</td>
</tr>
<tr>
<td>OSHA/PEL (respirable dust)</td>
</tr>
<tr>
<td>Cal OSHA/PEL</td>
</tr>
</tbody>
</table>

8.2 **Appropriate engineering controls:** Use local exhaust ventilation to keep airborne concentrations of dust below permissible exposure limits.

8.3 **Personal protection equipment:**

Eye and face protection: Eye protection according to ANSI Z.87.1 or other national standards may be warranted if environment is excessively dusty.

Skin protection: Standard work gloves (cotton, canvas or leather) may be warranted if environment is excessively dusty.

Respiratory protection: Where airborne concentrations are expected to exceed exposure limits, respirators should be used.

---

**Section 9**

**Physical and chemical properties**

9.1 **Information on basic physical and chemical properties**

**Appearance:** White, crystalline solid

**Odour:** Odourless

**Odour threshold:** Not applicable: odourless

**pH @ 20°C:** 8.3 (3.0% solution); 7.6 (10.0% solution)

**Melting point/ Freezing point:** 815°C

**Initial boiling point and boiling range:** Not applicable: melting point 815°C
Flash point: Not applicable: inorganic substance
Evaporation rate: Not applicable: non-volatile
Flammability: Non-flammable (used as a flame retardant)
Upper/lower flammability or explosive limits: Not applicable: non-flammable
Vapour pressure: Not applicable: melting point 815°C
Vapour density: Not applicable: melting point 815°C
Relative density: 1.87@22°C
Solubility(ies): Water: 223.65 g/L @ 20°C
Partition coefficient; n-octanol/water: Not applicable: inorganic substance
Auto-ignition temperature: Not applicable: not self-heating
Decomposition temperature: Not applicable: melting point 815°C
Viscosity: Not applicable: solid substance
Explosive properties: Not explosive: does not contain chemical groups associated with explosive properties
Oxidising properties: Not oxidising: does not contain chemical groups associated with oxidising properties

9.2 Other information
Molecular weight: 412.52
Formula: Na₂B₈O₁₃·4H₂O

Section 10 Stability and reactivity

10.1 Reactivity: None known.

10.2 Chemical stability: Under normal ambient temperatures (-40°C to +40°C), the product is stable.

10.3 Possibility of hazardous reactions: Reaction with strong reducing agents such as metal hydrides or alkali metals will generate hydrogen gas which could create an explosive hazard.

10.4 Conditions to avoid: Avoid contact with strong reducing agents by storing according to good industrial practice.

10.5 Incompatible materials: Strong reducing agents.

10.6 Hazardous decomposition products: None.

Section 11 Toxicological Information

11.1 Information on the likely routes of exposure (inhalation, ingestion, skin and eye contact)
Inhalation is the most significant route of exposure in occupational and other settings. Dermal exposure is not usually a concern because product is poorly absorbed through intact skin. Product is not intended for ingestion.

(a) Acute toxicity
Method: Acute Oral Toxicity Study – OECD Guidelines 401
Species: Rat
Dose: 1.25; 2; 3.15; 5 g/kg of body weight
Routes of Exposure: Oral
Results: Low acute oral toxicity. LD₅₀ in male rats is 2,550 mg/kg of body weight males.
Classification: Acute Toxicity (Oral) Category 5 (Hazard statement: H303: May be harmful if swallowed)

Method: Acute Dermal Toxicity Study – similar to OECD Guideline 402
Species: Rabbit
Dose: 2,000 mg/kg bw
Routes of Exposure: Dermal
Results: Low acute dermal toxicity; LD₅₀ in rabbits is > 2,000 mg/kg of body weight. Poorly absorbed through intact skin. Based on the available data, the classification criteria are not met.

Method: Acute Inhalation Toxicity Study – OECD Guideline 403
Species: Rat
Dose: 2.01 mg/L
Routes of Exposure: Inhalation
Results: Low acute inhalation toxicity. LC₅₀ in rats is > 2.0 mg/L (or g/m³). Based on the available data, the classification criteria are not met.
(b) Skin corrosion / irritation:
Method: Primary Dermal Irritation Study – U.S. EPA FIFRA Guidelines
Species: New Zealand White Rabbit
Dose: 0.5 g
Routes of Exposure: Dermal
Results: No skin irritation. Mean Primary Irritation Score: 0.5. Based on the available data for the hydrated forms of sodium tetraborate, the classification criteria are not met.

(c) Serious eye damage / irritation:
Method: Eye Irritation Study – similar to OECD Guideline 405
Species: New Zealand White Rabbit
Dose: 0.1 g
Routes of Exposure: Eye
Results: Not irritating. Induced slight iritis, conjunctivae redness and chemosis, reversible after 4-7 days with a return to near normal by 7 days after exposure.
Classification: Based on mean scores of ≤ 1, and the effects were fully reversible within 7 days, the classification criteria are not met. Many years of occupational exposure indicate no adverse effects on human eye.

(d) Respiratory or skin sensitisation:
Method: Buehler Test – OECD Guideline 406
Species: Guinea Pig
Dose: 0.4 g of a 95% w/w mixture in distilled water
Routes of Exposure: Dermal
Results: Not a skin sensitiser. No respiratory sensitisation studies have been conducted. There are no data to suggest that boric acid or sodium borates are respiratory sensitisers. Based on the available data, the classification criteria are not met.

(e) Germ cell mutagenicity:
Method: Several in vitro mutagenicity studies have been carried out on boric acid including gene mutation in mammalian cells, unscheduled DNA synthesis, chromosomal aberration and sister chromatid exchange in mammalian cells.
Species: L5178Y mouse lymphoma, V79 Chinese hamster cells, C3H/10T1/2 cells, hepatocytes, Chinese hamster ovary (CHO cells).
Dose: 1.0 - 10.0 mg/ml (1000 -10000 ppm) boric acid
Routes of Exposure: in vitro
Results: Not mutagenic (based on boric acid). Based on the available data, the classification criteria are not met.

(f) Carcinogenicity:
Method: OECD 451 equivalent.
Species: B6C3F1 mice
Dose: 446; 1150 mg boric acid/kg bw/day
Routes of Exposure: Oral feeding study
Results: No evidence of carcinogenicity (based on boric acid). Based on the available data, the classification criteria are not met.

(g) Reproductive toxicity:
Method: Three-generation feeding study, similar to OECD 416 Two-Generation Study
Species: Rat
Dose: 0; 34 (5.9); 100 (17.5); and 336 (58.5) mg boric acid (mg B)/kg bw/day
Routes of Exposure: Oral feeding study
Results: NOAEL in rats for effects on fertility in males is 100 mg boric acid/kg bw equivalent to 17.5 mg B/kg bw.

Method: Prenatal Developmental Toxicity Study of Boric Acid - OECD Guideline 414
Species: Rat
Dose: 0; 19 (3.3); 36 (6.3); 55 (9.6); 76 (13.3) and 143 (25) mg boric acid (mg B)/kg bw.
Routes of Exposure: Oral feeding study
Results: NOAEL in rats for developmental effects on the foetus including foetal weight loss and minor skeletal variations is 55 mg boric acid/kg bw or 9.6 mg B/kg.
Classification: Reproductive Toxicity Category 2 (Hazard statement: H361: Suspected of damaging fertility or the unborn child.)

Method: Occupational studies of evaluating sensitive sperm parameters in highly exposed borate workers. Epidemiological studies evaluating high environmental exposures to boron and developmental effects in humans have been conducted.
Species: Human
Dose: A subset of workers was exposed to 125 mg B/day.
Routes of Exposure: Combined oral ingestion and inhalation
Results: No adverse fertility effects in male workers. Epidemiological studies of human developmental effects have shown an absence of effects in exposed borate workers and populations living in areas with high environmental levels of boron.
(h) STOT-single exposure:
Species: Mouse
Dose: 186 – 1704 mg sodium tetraborate pentahydrate/m³
Routes of Exposure: Inhalation
Results: The maximum exposure of 1704 sodium tetraborate pentahydrate/m³ resulted in a reduced respiratory rate of 33%, graded as moderate irritation. The lowest exposure tested of 186 mg/m³ sodium tetraborate pentahydrate resulted in a reduced respiration rate of 11%, graded as no irritation. Based on the available data, the classification criteria are not met.

Method: Sensory irritation in human volunteers
Species: Human
Dose: 5 - 40 mg sodium tetraborate pentahydrate/m³
Routes of Exposure: Inhalation
Results: A NOAEL for irritation from sodium tetraborate pentahydrate of 10 mg/m³ among male and female human volunteers under controlled laboratory conditions. At 10 mg/m³ increased nasal secretion was observed, but occurred in the absence of other irritating effects at a concentration below that considered irritating by volunteers and was not seen in a subsequent study.

(i) STOT-repeated exposure:
Method: Chronic toxicity study of boric acid and disodium tetraborate decahydrate, similar to OECD 452
Species: Rat
Dose: 0; 33 (5.9); 100 (17.5); 334 (58.5) mg boric acid (B)/kg bw per day (nominal in diet); and 0; 52 (5.9); 155 (17.5); 516 (58.5) mg borax (B)/kg/day (nominal in diet)
Routes of Exposure: Oral feeding study
Results: A NOAEL of 17.5 mg B/kg bw/day equivalent to 118 mg sodium tetraborate pentahydrate/kg bw/day was determined in a chronic feeding study (2 years) in rats and is based on testes effects. Other effects (kidney, haemopoietic system) are regarded only at even higher dose levels. Based on the available data, the classification criteria are not met.

(j) Aspiration hazard: Physical form of solid powder indicates no aspiration hazard potential.

11.2 Symptoms related to the physical, and chemical and toxicological characteristics:
Products are not intended for ingestion. Small amounts (e.g. a teaspoonful) swallowed accidentally are not likely to cause effects. Symptoms of accidental over-exposure to high doses of inorganic borate salts have been associated with ingestion or absorption through large areas of severely damaged skin. These may include nausea, vomiting, and diarrhoea, with delayed effects of skin redness and peeling.

11.3 Delayed and immediate effects as well as chronic effects from short and long-term exposure:
Human epidemiological studies show no increase in pulmonary disease in occupational populations with chronic exposures to boric acid and sodium borate dust. Human epidemiological studies indicate no effect on fertility in occupational populations with chronic exposures to borate dust and indicate no effect to a general population with high exposures to borates in the environment.

11.4 Numerical measures of toxicity (such as acute toxicity)
None. This product is a substance.

Section 12 Ecological information

12.1 Ecotoxicity (aquatic and terrestrial, where available)
Note that the data values are expressed as boron equivalents. To convert to this product divide the boron equivalent by 0.21. Studies judged to be unreliable or with insufficient information to evaluate are not included.

Results: Based on the complete data set, the HC5 value of the species sensitivity distribution is 10.8 mg B/kg dw.

**Phytotoxicity:** Boron is an essential micronutrient for healthy growth of plants. It can be harmful to boron sensitive plants in higher quantities. Care should be taken to minimise the amount of borate product released to the environment.

12.2 **Persistence and Degradability**

Biodegradation is not an applicable endpoint since the product is an inorganic substance.

12.3 **Bioaccumulative potential**

This product will undergo hydrolysis in water to form undissociated boric acid. Boric acid will not biomagnify through the foodchain.

Octanol/Water partition coefficient: Log P_{ow} = -0.7570 @ 25°C (based on boric acid).

12.4 **Mobility in soil**

The product is soluble in water and is leachable through normal soil. Adsorption to soils or sediments is insignificant.

12.5 **Other adverse effects**

None

### Section 13 Disposal considerations

#### 13.1 Disposal methods

Product packaging should be recycled where possible.

Local authorities should be consulted about any specific local requirements

Such product should, if possible, be used for an appropriate application.

### Section 14 Transport information

**Transport Classification for Road (ADR/DOT/TDG) / Rail (RID); Inland waterways (ADN); Sea (IMDG); Air (ICAO/IATA)**

14.1 **UN Number:** Not Regulated

14.2 **UN Proper Shipping Name:** Not Regulated

14.3 **Transport hazard class(es):** Not Regulated

14.4 **Packing Group:** Not Regulated

14.5 **Environmental Hazards (e.g. marine pollutant):** Not Regulated

14.6 **Special precautions for user:** Not Regulated

14.7 **Transport in bulk according to Annex II of Marpol 73/78 and the IBC code:** Not Regulated

### Section 15 Regulatory information

15.1 **Safety, health and environmental regulations/legislation specific for the substance or mixture**

**Clean Air Act (Montreal Protocol) - Substances that deplete the ozone layer:** Not manufactured with and does not contain any Class I or Class II ozone depleting substances.

**NPRI (Canada):** This product is not listed on the Canadian National Pollutant Release Inventory.

**Regulation (EC) No 689/2008 - Export and Import of Dangerous Chemicals:** Not listed.

**National Regulations:** Ensure all national/local regulations are observed.
**U.S. EPA RCRA:** This product is not listed as a hazardous waste under any sections of the Resource Conservation and Recovery Act (RCRA) or regulations (40 CFR 261 et seq).

**US EPA FIFRA & Canada PMRA PCPA:** This product is a pesticide registered by the Environmental Protection Agency (EPA Reg. No 1624-39) and Canada Pest Management Regulatory Agency (PCP Reg No. 18879) and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of non-pesticide chemicals.

Following is the hazard information as required on the EPA pesticide label:

**CAUTION**
Harmful if swallowed.
Causes moderate eye irritation.
Avoid contact with eyes or clothing.
Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

Following is the hazard information as required on the PMRA pesticide label:

**PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN.** May be harmful if swallowed.
Avoid breathing the dust and contact with skin, eyes and clothing. Wear a dust mask when mixing *Tim-bor* Industrial Wood Preservative. Wear chemical resistant gloves when handling wet lumber. Wash thoroughly after handling and before eating, drinking or smoking. Do not reuse empty container. Do not contaminate water, food, feed or any body of water.

**Superfund:** CERCLA/SARA. This product is not listed under CERCLA (Comprehensive Environmental Response Compensation and Liability Act) or its 1986 amendments, SARA (Superfund Amendments and Reauthorization Act), including substances listed under Section 313 of SARA, Toxic Chemicals, 42 USC 11023, 40 CFR 372.65, Section 302 of SARA, Extremely Hazardous Substances, 42 USC 11002, 40 CFR 355, or the CERCLA Hazardous Substances list, 42 USC 9604, 40 CFR 302.

**Safe Drinking Water Act (SDWA):** This product is not regulated under the SDWA, 42 USC 300g-1, 40 CFR 141 et seq. Consult state and local regulations for possible water quality advisories regarding boron compounds.

**Clean Water Act (CWA) (Federal Water Pollution Control Act):** 33 USC 1251 et seq.
   a) This product is not itself a discharge covered by any water quality criteria of Section 304 of the CWA, 33 USC 1314.
   b) It is not on the Section 307 List of Priority Pollutants, 33 USC 1317, 40 CFR 129.
   c) It is not on the Section 311 List of Hazardous Substances, 33 USC 1321, 40 CFR 116.

**IARC:** The International Agency for Research on Cancer (IARC) (a unit of the World Health Organization) does not list or categorize this product as a carcinogen.

**NTP Biennial Report on Carcinogens:** This product is not listed.

**OSHA carcinogen:** This product is not listed.

**California Proposition 65:** This product is not listed on the Proposition 65 list of carcinogens or reproductive toxicants.

**Chemical inventory listing:** The listing is sometimes under the Inventory number of the anhydrous form of this inorganic salt.
